

Business Rules Answers

Before Insert

Calculate Incident Priority on Server

```
(function executeRule(current, previous) {  
  
    if (current.impact == 1 && current.urgency == 1)  
        current.priority = 1;  
    else if (current.impact == 2 && current.urgency == 2)  
        current.priority = 2;  
    else  
        current.priority = 3;  
  
})(current, previous);
```

Set Opened By to Current User if Blank

```
(function executeRule(current, previous) {  
  
    if (!current.opened_by) {  
        current.opened_by = gs.getUserID();  
    }  
  
})(current, previous);
```

Force Knowledge Article to Draft on Insert

```
(function executeRule(current, previous) {  
  
    current.workflow_state = 'draft';  
  
})(current, previous);
```

Set Published Date When Article Published

```

(function executeRule(current, previous) {

    if (current.workflow_state == 'published' && previous.workflow_state != 'published') {
        current.published = gs.nowDateTime();
    }

})(current, previous);

```

After Insert

Create Problem After Repeated Active Incidents on Same CI

```

(function executeRule(current, previous) {

    if (!current.cmdb_ci) return;

    var count = new GlideAggregate('incident');
    count.addQuery('cmdb_ci', current.cmdb_ci);
    count.addActiveQuery();
    count.addAggregate('COUNT');
    count.query();

    if (count.next() && count.getAggregate('COUNT') >= 3) {

        var problem = new GlideRecord('problem');
        problem.initialize();
        problem.short_description = "Repeated incidents for
CI: " + current.cmdb_ci.getDisplayValue();
        problem.cmdb_ci = current.cmdb_ci;
        problem.insert();
    }

})(current, previous);

```

Assign Network Incidents to Network Group Automatically

```
(function executeRule(current, previous) {

    if (current.category == 'network') {
        current.assignment_group.setDisplayValue('Network');
    }

})(current, previous);
```

Close Child Incidents When Parent Closed

```
(function executeRule(current, previous) {

    if (current.state == 7) {

        var child = new GlideRecord('incident');
        child.addQuery('parent_incident', current.sys_id);
        child.query();

        while (child.next()) {
            child.state = 7;
            child.update();
        }

    }

})(current, previous);
```

Create Review Task When Incident Reassigned 3 Times

```
(function executeRule(current, previous) {

    if (current.assignment_group != previous.assignment_group) {

        current.u_reassign_count = (current.u_reassign_count || 0) + 1;

        if (current.u_reassign_count == 3) {
```

```
        var task = new GlideRecord('task');
        task.initialize();
        task.short_description = "Review repeated reass
assignment for " + current.number;
        task.description = "Incident reassigned three t
imes.";
        task.insert();
    }
}

})(current, previous);
```
