

Script Include Questions

Lab Day 27-4

TASK 52 — Get Active Incident Count for a Caller

Script Include:

```
var GetCallerIncidentCount = Class.create();
GetCallerIncidentCount.prototype = Object.extend(Object.prototype, {

    getCount: function() {

        var callerId = this.getParameter('sysparm_caller');

        var gr = new GlideRecord('incident');
        gr.addQuery('caller_id', callerId);
        gr.addActiveQuery();
        gr.query();

        return gr.getRowCount();
    },

    type: 'GetCallerIncidentCount'
});
```

Client Script:

```
function onChange(control, oldValue, newValue, isLoading) {
    if (isLoading || !newValue) return;

    var ga = new GlideAjax('GetCallerIncidentCount');
    ga.addParam('sysparm_name', 'getCount');
    ga.addParam('sysparm_caller', newValue);

    ga.getXMLAnswer(function(response) {
        g_form.addInfoMessage("Active Incidents: " + response);
    });
}
```

```
se);
    });
}
```

TASK 53 — Get CI Support Group

Script Include:

```
var GetCISupportGroup = Class.create();
GetCISupportGroup.prototype = Object.extend(Object.prototype, {

    getGroup: function() {

        var ciId = this.getParameter('sysparm_ci');

        var gr = new GlideRecord('cmdb_ci');
        if (gr.get(ciId)) {
            return gr.support_group.toString();
        }

        return '';
    },

    type: 'GetCISupportGroup'
});
```

Client Script:

```
function onChange(control, oldValue, newValue, isLoading) {
    if (isLoading || !newValue) return;

    var ga = new GlideAjax('GetCISupportGroup');
    ga.addParam('sysparm_name', 'getGroup');
    ga.addParam('sysparm_ci', newValue);

    ga.getXMLAnswer(function(response) {
        g_form.setValue('assignment_group', response);
    });
}
```

```
});  
}
```

TASK 54 — Check Whether Caller is VIP

Script Include:

```
var CheckCallerVIP = Class.create();  
CheckCallerVIP.prototype = Object.extend(Object.prototype, {  
  isVIP: function() {  
    var callerId = this.getParameter('sysparm_caller');  
  
    var gr = new GlideRecord('sys_user');  
    if (gr.get(callerId)) {  
      return gr.vip.toString();  
    }  
  
    return 'false';  
  },  
  
  type: 'CheckCallerVIP'  
});
```

Client Script:

```
function onChange(control, oldValue, newValue, isLoading) {  
  if (isLoading || !newValue) return;  
  
  var ga = new GlideAjax('CheckCallerVIP');  
  ga.addParam('sysparm_name', 'isVIP');  
  ga.addParam('sysparm_caller', newValue);  
  
  ga.getXMLAnswer(function(response) {  
    if (response == 'true') {  
      g_form.addInfoMessage("This caller is VIP");  
    }  
  })  
}
```

```
});  
}
```

TASK 57 — Get Selected User's Department

Script Include:

```
var GetUserDepartment = Class.create();  
GetUserDepartment.prototype = Object.extend(Object.prototype, {  
  AjaxProcessor, {  
  
    getDept: function() {  
  
      var userId = this.getParameter('sysparm_user');  
  
      var gr = new GlideRecord('sys_user');  
      if (gr.get(userId)) {  
        return gr.department.getDisplayValue();  
      }  
  
      return '';  
    },  
  
    type: 'GetUserDepartment'  
  }  
});
```

Client Script:

```
function onChange(control, oldValue, newValue, isLoading) {  
  if (isLoading || !newValue) return;  
  
  var ga = new GlideAjax('GetUserDepartment');  
  ga.addParam('sysparm_name', 'getDept');  
  ga.addParam('sysparm_user', newValue);  
  
  ga.getXMLAnswer(function(response) {  
    g_form.setValue('u_department', response);  
  });  
}
```

```
});  
}
```

TASK 61 — Category to Group Routing

Script Include:

```
var CategoryRouting = Class.create();  
CategoryRouting.prototype = Object.extend(Object.prototype, {  
  ajaxProcessor: {  
    getGroup: function() {  
      var category = this.getParameter('sysparm_category');  
  
      if (category == 'network')  
        return 'Network Team';  
  
      if (category == 'hardware')  
        return 'Hardware Team';  
  
      if (category == 'software')  
        return 'Software Team';  
  
      return 'Service Desk';  
    },  
    type: 'CategoryRouting'  
  }  
});
```

Client Script:

```
function onChange(control, oldValue, newValue, isLoading) {  
  if (isLoading || !newValue) return;  
  
  var ga = new GlideAjax('CategoryRouting');  
  ga.addParam('sysparm_name', 'getGroup');  
  ga.addParam('sysparm_category', newValue);  
}
```

```

ga.getXMLAnswer(function(response) {
    g_form.addInfoMessage("Route to: " + response);
});
}

```

TASK 68 — Return Manager Name for Requested For User

Script Include:

```

var GetManagerName = Class.create();
GetManagerName.prototype = Object.extend(Object.prototype, {

    getManager: function() {

        var userId = this.getParameter('sysparm_user');

        var gr = new GlideRecord('sys_user');
        if (gr.get(userId)) {
            return gr.manager.getDisplayValue();
        }

        return '';
    },

    type: 'GetManagerName'
});

```

Client Script:

```

function onChange(control, oldValue, newValue, isLoading) {
    if (isLoading || !newValue) return;

    var ga = new GlideAjax('GetManagerName');
    ga.addParam('sysparm_name', 'getManager');
    ga.addParam('sysparm_user', newValue);

    ga.getXMLAnswer(function(response) {

```

```
        g_form.setValue('u_manager', response);  
    });  
}
```
